Dear Dr. Stokes:

I understand public input is being considered currently on the subject of the Draize test on animals. I strongly disagree with such a cruel test & have for years. For what it's worth, I would like to see alternate methods of testing as soon as possible so the Draize test would become a thing of the past. Just one human subject to such a test would surely make it stop.

Please help in any way you can.

Thank you,

Jennifer Speake
