RADM William S. Stokes  
Director, National Toxicology Program Interagency Center for  
the Evaluation of Alternative Toxicological Methods  
National Institute of Environmental Health Sciences  
P.O. Box 12233, K2-16  
Research Triangle Park, North Carolina 27709

Dear RADM Stokes:

I am responding to Dr. Birnbaum's June 30, 2011, letter transmitting the test recommendations from the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM) as required by Section 3(e)(4) of the ICCVAM Authorization Act of 2000 (42 U.S.C. 285f-3). As indicated in the ICCVAM report, the recommendations are for a specific criterion for the murine local lymph node assay to be used in potency categorization of chemicals that may cause allergic contact dermatitis in humans.

We appreciate the Committee's recommendations and note that the ICCVAM Authorization Act (P.L. 106-545, Section 5, Application (a)) states that this Act does not apply to NIH programs. You should know, however, that the Office of Laboratory Animal Welfare within the Office of Extramural Research will provide access to ICCVAM's test recommendations through a Web link.

NIH remains committed to animal welfare efforts and to research efforts that improve human and animal health. Additionally, we promote the development of sound research designs and alternative methods to reduce the use of animals in biomedical research.

My understanding is that other components of the NIH will be responding to your transmittal as well.

Sincerely yours,

/s/

Francis S. Collins, M.D., Ph.D.  
Director
