

To Whom It May Concern:

I feel that all animal testing is unnecessary. There is no reason for humans to test on animals. It is cruel and utterly ridiculous in this day and age. We need to expand our thinking to realize that testing on animals is cruel and abusive. There are plenty of non-animal alternatives. We can put astronauts on the moon, but we still need to pour drain cleaner into the eyes of innocent rabbits and rats to see that it burns and causes blindness.

Hello????!!!!!!

Sincerely,

Doug Shohan
